LA TIERRA

RESOURCE INTELLIGENCE LLC

CAPABILITY STATEMENT | EARTH SCIENCE | CRITICAL MINERALS | DATA INTELLIGENCE

COMPANY OVERVIEW

La Tierra Resource Intelligence LLC specializes in geoscience research, data services, and technical information compilation. We analyze, migrate, integrate, and synthesize historical and contemporary Earth science, geological, mineral-resource, and critical-mineral data, producing geospatial analyses, technical reports, and decision-support products. As a woman-owned small business, La Tierra serves government agencies, private industry, and research organizations by transforming fragmented technical information into organized, accessible, and actionable intelligence.

CORE COMPETENCIES

- Geological, mineral-resource and critical-mineral research
- Global mineral-industry research and country reporting
- Historical and contemporary data migration and integration
- GIS, cartography and spatial analysis
- Technical dataset quality review and reconciliation
- Groundwater, hydrology and environmental data research
- Scientific literature, archives and primary-source research

TECHNICAL DIFFERENTIATORS

- Global resource research and primary-source expertise
- Federal research, regulatory and contracting experience
- Integration of mineralogical, spatial and historical evidence

GEOLOGICAL FIELD EXPERIENCE

Geological field investigations and research in North and South America, Asia and Oceania, including the United States, Canada, Mexico, Chile, Argentina, Russia's Far East, Taiwan, and Papua New Guinea. Languages: Spanish and Japanese.

BUSINESS INFORMATION

LEGAL ENTITY
La Tierra Resource Intelligence LLC

UEI
P4CCW2ELPKY9

CAGE

PRIMARY NAICS
541620

ADDITIONAL NAICS
541690 | 541360 | 213114

OWNERSHIP
Woman-owned; single-member LLC

Located in a qualified HUBZone

GEOGRAPHIC SCOPE

U.S. and international Earth science and mineral-resource information research, including critical minerals, mineral industries, production data, historical exploration and global comparisons.

PRINCIPAL QUALIFICATIONS | INDIVIDUAL PROFESSIONAL EXPERIENCE

EDUCATION
B.S., Geology; M.A., Disaster Management; doctoral-level graduate research in mineralogy, petrology and volcanology;
M.S. Data Science (in progress).

USGS
Global mineral-resource research, international country reporting, mineral-industry analysis and geological data compilation.

CDC / NIOSH
Research on naturally occurring asbestos mineralogy and geology in relation to miner health and safety; COVID-19 emergency response data analytics deployments and data-quality work.

DOE
Groundwater monitoring wells, groundwater investigations and chromium plume technical oversight; liaison with expert research teams and stakeholders; Contracting Officer's Representative (COR II) for environmental cleanup activities.

STATE GOVERNMENT
Oil and gas industry compliance and regulatory oversight, including technical review of drilling and casing documentation.

Principal experience is not represented as prior contract performance by La Tierra Resource Intelligence LLC.
